I am a **researcher in physics** at the *National Research Council of Italy* (CNR), based at the Department of Physics of the University of Calabria. Previously, I worked at the *Institut de Physique de Rennes* (France), *Brown University* (USA), *Massachusetts Institute of Technology* (USA), *Università della Calabria* (Italy), and *Université Paris Diderot* (France).

My research aims at contributing to the fields of fundamental **fluid dynamics**, *active complex systems*, and **quantum foundations**, the latter by developing classical *analogs of quantum phenomena*.

My research occasionally touches on *physics teaching*, soft matter, and applied physics.

My research approach combines relatively low-cost **experimental physics** with **theoretical modeling**, and benefits from continuous collaboration with theorists.
